Fund Name	Investment Objective	Risk Characteristics (if applicable)	Current Asset Allocation	Net Expense Ratio
<b>Prudential Real Assets Fund</b>	The Separate Account (the "Fund") invests wholly in the Class Z share class of the Prudential Real Assets Fund ("Mutual Fund"). The investment seeks long-term real return. The Mutual Fund invests primarily in real assets that may perform well in periods of high inflation. Real return is the rate of return after adjusting for inflation. It invests in real assets through its investments within the following asset classes: commodities; domestic and international real estate; utilities/infrastructure; natural resources; master limited partnerships (MLPs); fixed income instruments; and gold/defensive. The fund is non-diversified. Portfolio level data is of the underlying mutual fund.	Sector funds are subject to risks within their specific sectors because they concentrate their investments in securities of companies within certain industries. Therefore, the price of these securities can be volatile. The real estate industry is greatly affected by economic downturns that may persist as well as changes in property values, interest rates, taxes, environmental issues and regulatory developments. <b>International Growth / Artisan Partners Fund</b>	Artisan Non-U.S. Growth Strategy seeks maximum long-term capital growth. The Artisan Non-U.S. Growth strategy employs a fundamental stock selection process focused on identifying long-term growth opportunities to build a portfolio of non-U.S. growth companies of all market capitalizations. The investment team's thematic approach identifies catalysts for change and develops investment themes with the objective of capitalizing on them globally.	Investments in large cap funds are subject to market fluctuations and may lose value. The investment risks associated with these funds may be impacted by a variety of factors, including investment style, objective, holdings, and focus in particular industries. On average, investments in large cap funds may be considered more conservative than investments in small and mid-cap funds, potentially posing less overall volatility in exchange for less aggressive growth potential. Investing in foreign securities presents certain unique risks not associated with domestic investments, such as currency fluctuation and political and economic changes. This may result in greater share price volatility.	International Equity 90.66% US Equity 6.43% Cash 2.91%	0.88%
